## PROJECTS

### Netflix Clone - 2022 - ReactJS/Firebase/Redux/Axios

Netflix clone using tmdb API and Firestore/Google Auth.

### More Pay - 2022 - React Native/Firebase

Application aiming at finding staff for restaurants in Australia by swiping through the profiles of the potential futur employees.

### The Squirrelz - 2022 - Solidity/React/NodeJS

Generative art library to create a collection of avatars, generate compliant NFT metadata, and upload the metadata JSON and media files to IPFS.

### Libft - 2021 - C language

Libft is an individual project at 42 School that require us to re-create 52 standard C library functions for future projects, and have a deeper understanding of data structures and basic algorithms. At 42 we are not allowed to use some standard libraries on our projects, so we have to keep growing this library with our own functions as we go farther in the program.

### Printf - 2021 - C language

Printf is a vital function. In this project, we are ask to recode it and add it to our Libft so that we can use it in all of our future projects.

### Weather App - 2020 - Flutter/Dart

A simple app that will give you suggestion on what to wear/do using the latest weather status at your current location.
